Internet Performance Monitoring

Ensure the resilience of your Internet Stack with Catchpoint

Are you tired of reactive incident management for your Internet Stack? Catchpoint's Internet Performance Monitoring (IPM) provides deep visibility into every aspect of the Internet, allowing you to identify and resolve issues before they impact your business.

Trusted by the world's top 6 cloud service providers, the 4 leading global retailers, 9 of the top 10 CDNs, the largest

MSPs and many other leading global brands, Catchpoint is the industry-leading choice for monitoring your Internet Stack.

Our IPM platform is comprised of five top-performing solutions for complete operational visibility into all aspects of your business: Customer, Workforce, Network, Application, and Website Experience.

Customer

Workforce

Applications

Website

Ensure resilience across your enterprise

For your customers

Catchpoint's global observability network monitors performance from over 2,000 vantage points

Catch issues across the Internet Stack before they impact your customers

Catchpoint's Customer Experience solution gives you complete visibility into every layer of your service delivery chain from the end user's perspective. With the largest network in the industry and continuous active monitoring, you'll ensure a resilient Internet, deliver exceptional digital experiences for your customers, and drive the success of your business.

For your websites

Cross-browser synthetic testing from WebPageTest, the gold standard for performance testing

Protect your revenue and reputation with our comprehensive Website Experience solution

Catchpoint's Website Experience solution uses the touchstone of webpage performance testing, WebPageTest, to deliver the most accurate and comprehensive performance tracking tools available today. By monitoring your site's speed, usability, and resilience in real browsers, devices, and locations worldwide, you'll rapidly identify and fix performance bottlenecks before they impact your business.

For your workforce

Unparalleled depth and breadth of visibility into your workforce's digital experience, wherever they are located

Gain the insight you need to detect and troubleshoot remote connectivity performance and SaaS issues before they impact your distributed workforce

Catchpoint's Workforce Experience solution gives you end-to-end visibility into business-critical applications across the Internet Stack, from endpoint WiFi and SASE/VPN connectivity to SaaS and cloud environments so you can find and fix problems fast, no matter where your workforce is.

For your internal and external networks

Unique depth of insight into your networks to ensure users can always navigate the digital service delivery chain

Ensure the network is reachable – not just available – from anywhere, all the time

Catchpoint's Network Experience solution easily lets you set up proactive observability for the Internet's most critical services, including BGP and third-party services like CDN and DNS. We identify root cause and provide the information network professionals need to determine ownership, avoid fingerprinting and accelerate MTTR.

For your applications and APIs

2,000+ global vantage points to customize and match monitoring use cases

Go beyond traditional APM to ensure the resilience of your business-critical applications

Catchpoint's Application Experience solution provides a critical outside-in perspective to ensure your applications and services are available, functional, and performant across all channels of the digital customer and workforce experience, in real time. By actively monitoring your cloud applications from the same distributed locations as your users, you'll detect reliability issues fast, regardless of where they are on the planet.

Catchpoint is the Internet Resilience Company™. The top online retailers, Global2000, CDNs, cloud service providers, and xSPs in the world rely on Catchpoint to increase their resilience by catching any issues in the Internet Stack before they impact their business. Catchpoint's Internet Performance Monitoring (IPM) suite offers synthetics, RUM, performance optimization, high fidelity data and flexible visualizations with advanced analytics. It leverages thousands of global vantage points (including inside wireless networks, BGP, backbone, last mile, endpoint, enterprise, ISPs and more) to provide unparalleled observability into anything that impacts your customers, workforce, networks, website performance, applications and APIs.
